The ARENA 330 Shipper™

The Arena 330 Shipper.™

Ships, Handles, Stores & Recycles More Easily And Cost Effectively.

For Shipping Non-Hazardous Liquids, One Box Beats Six Drums.

The largest volume capacity of any collapsible plastic liquid shipper. Durable and lightweight.

Compact, convenient and cost effective. The Arena 330 Shipper beats 55-gallon drums, tank-style IBCs, disposable IBCs and everything else. That's because its unique knock-down design, disposable liquid liner, and space-saving shape can easily handle bulk liquid loads of 3000 lb. or up to 330 gallons. In fact, you can ship nearly 50% more product in the space required for four palletized 55-gallon drums.

The Arena 330 Shipper can be set up or knocked down in seconds by a single operator. It offers built-in advantages which accommodate a wide variety of filling and discharge methods—tailored to your needs. You also can reduce expensive return and disposal costs, too. Watch the savings mount up fast with every load from better handling, shipping, and storage.

These revolutionary, reusable containers are designed to withstand the dynamic

pressures associated with the transport of bulk liquids or solids. By applying computer and composite technology developed for the automotive and aerospace industries, we've created a material breakthrough in containers—a greater strength-to-weight ratio than steel.

- State-of-the-art design and engineering technology for rugged reliability.
- Advanced composite thermoplastic construction for long-lasting durability.
- Extensively tested to meet or exceed ASTM standards.

Save A Stack Of Storage Costs With This IBC System.

These containers also nest and lock together in a stack to eliminate pallet racking and save time.

- Stack Arena 330 Shippers four-high, full of product.
- Increase storage space—weather-resistant, non-corrosive, stack and store containers outside, rain or shine.

Self-securing covers offer additional protection.

- Integrated skid pads with four-way forklift access make containers easy to move and store.

*Stack up
all of these time,
labor, and cost-saving
advantages*

- Eliminate product contamination with durable, disposable liquid liner.
- Save labor — no flushing and effluent disposal, less solid waste.
- Return shipping efficiency — tote collapses to approximately 1/3 of its set up size.
- Improve space utilization — stack four-high full of product, inside or outside.
- Reduce handling costs — easier to fill, empty, move and store.
- Reusable, recyclable thermoplastic container.
- Lower maintenance — easily replaceable parts and modular construction saves money.

Rack Up More Savings From Easy Recycling And Disposal.

You'll significantly reduce the costly disposal of metal drums or disposable IBCs and eliminate the labor-intensive cleaning, flushing and effluent waste-water treatment problems so common with tank-style IBCs. The Arena 330 Shipper features a single-use liner bag that can be easily recycled, landfilled or incinerated. The bag also virtually eliminates any product contamination, too. You can reduce waste to about 10 lb. per 330 gallon shipment compared to alternative disposable packaging that can generate as much as 200 lb. of waste.

Best of all, the Arena 330 Shipper is completely reusable and recyclable.

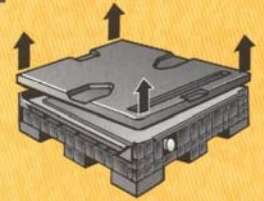

- Save time and reduce transport costs—collapsible shippers stack seven-high in trailers on the return.
- Lower maintenance costs—modular shipper design uses easily replaceable parts.

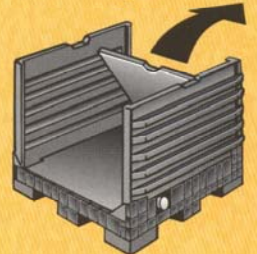

Top to bottom, you get a more environmentally friendly system that offers a powerful tool for source waste reduction while providing significant cost-and-labor saving benefits.

Set up and knock down can be done in seconds by a single operator.

- Remove cover and unfold the two 48-inch sidewalls, followed by the two 45-inch walls.

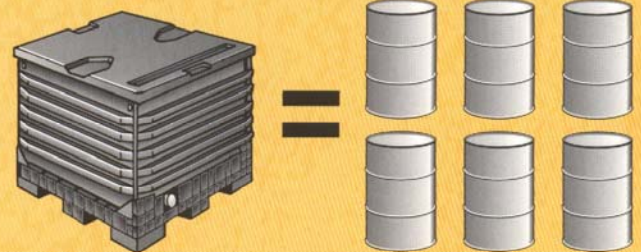

- Walls interlock in the corners and are snapped in place by integrated latches.

- Snap-in-place latches quickly secure the cover.

- Unit collapses to one-third its original size for efficient and economical return.

The fully loaded Arena 330 Shipper holds the contents of six 55-gallon drums in about the same space required for four drums.

- Ship nearly 50% more product in the space required for four palletized 55-gallon drums.
- Holds up to 3000 lb./330 gallons of non-hazardous bulk liquids, up to 4000 lb.

**Let Arena Help You
Hold Down A Load Of Costs.
Call 1-800-836-2528 Today.**

Choose the shipping solution that's convenient, cost-effective and environmentally sound. You can buy the Arena 330 Shippers with many different configurations of liquid liners as well as a full array fill-and-discharge systems and accessories. We also offer monthly rentals, container logistics management, cleaning, maintenance and liner disposal.

In total, you get a complete system that saves time, labor and disposal costs in transporting all types of non-hazardous bulk liquids and solids. Let us show you how the savings stack up to any other shipping method. For an in-depth review of your needs, call Arena toll-free at 1-800-836-2528.
